

Issue 23, April 2015

This quarterly report summarises the properties that attracted the most visitor enquiries on Kyero.com from January to March, 2015.

You can use this report when buying or selling a property in Spain to gauge market interest and the resale potential of a particular type of property in different areas of Spain.

Now, for the first time, you can see which location, price range, property type and property size attracts visitors of various nationalities.

Enquiries for leasehold, part ownership and rental properties are not included for the sake of clarity and, if an area is not listed, it is because there is not enough data currently available to render a report useful.

When the components of a chart do not add up to 100% it is due to the missing fraction being allocated amongst a number of 'other' selections - too small to show and, therefore, excluded for the sake of clarity.
